

Triangular shape of profiles minimizes air flow resistance and provides self-cleaning of the grid

## GAP RADIAL FLOOR GRILLES

- ✓ Safety and comfort of the user
- ✓ High open area
- ✓ Modern design with a longitudinal slot

**GAP RADIAL FLOOR GRILLES** are an innovative solution to cover ducted channel heating, line drainage, as well as doormats and elevated floors. The combination of the high open area and small slots ensure user comfort and safety. The use of high-quality stainless steel provides durability and advanced production technologies guarantee the highest aesthetics. Perfect for both external and internal applications, also in strongly exploited, polluted or moist areas.
